

Bishara Essa Barhoun

Quality Assurance Engineer

Manual | API | Mobile | Performance | Automation Testing
Amman, Jordan | +962 79 531 2109 | bshartb86@gmail.com

PROFESSIONAL SUMMARY

Quality Assurance Engineer and Software Engineering graduate with hands-on experience in manual, API, mobile, performance, and automation testing. Skilled in test planning, test case design, and functional, regression, and smoke testing across the full SDLC/STLC. Experienced in validating REST APIs with Postman, maintaining Selenium and Katalon Studio scripts, and tracking defects in Jira within Agile/Scrum teams. Strong in bug reporting, root cause analysis, and developer collaboration to deliver reliable, high-quality software releases.

TECHNICAL SKILLS

Manual Testing: Functional, Regression, Smoke, Sanity, Exploratory, UAT, Cross-Device Testing
API Testing: Postman, REST API validation, request/response & schema validation, status-code verification
Automation Testing: Selenium, Katalon Studio, test script maintenance & execution
Performance Testing: Response-time, load, and application-stability validation
Mobile Testing: Android & iOS, cross-device & cross-platform testing, emulators & real devices
Test Management: Jira, defect tracking, test case management, test documentation
Programming & Databases: SQL (Basic), relational databases, automation scripting (Selenium/Katalon)
Version Control & CI/CD: Git; exposure to CI/CD pipeline concepts (automated build & test)
AI Productivity Tools: AI-assisted test case generation, test data, debugging & documentation
Methodologies: Agile, Scrum, SDLC, STLC, Test Planning & Design

PROFESSIONAL EXPERIENCE

Quality Assurance Engineer

JoAcademy - Amman, Jordan | June 2024 - Present

Deliver end-to-end QA across web and mobile products - covering manual, API, automation, and performance testing - within Agile/Scrum teams.

Mafhoun - Web Platform

- Designed and executed detailed test cases covering positive, negative, and edge-case scenarios.
- Performed functional, regression, and smoke testing to validate release readiness across modules.
- Conducted API testing with Postman, validating responses, status codes, and data integrity.
- Logged and tracked defects in Jira, collaborating with developers to reproduce and resolve issues.
- Authored and maintained test cases, test data, and documentation to ensure traceability.

ULA - Mobile Application (Android & iOS)

- Executed functional and regression testing across Android and iOS devices.
- Performed cross-device and cross-platform testing for consistent behavior across OS versions and screen sizes.
- Conducted performance testing to validate response times and application stability.
- Carried out exploratory testing to surface edge-case defects, and validated API responses.
- Performed release validation and re-tested defects against acceptance criteria before production rollouts.

JoAcademy - E-Learning Platform

- Executed manual, API, and automated tests across web and mobile (functional, regression, and smoke).
- Maintained and updated Selenium and Katalon Studio regression scripts to match feature and UI changes.
- Validated REST APIs with Postman, verifying authentication, pagination, currency handling, and error responses.
- Contributed to test planning and execution in Agile/Scrum sprints and supported production releases with smoke checks.
- Performed root cause analysis and reported defects in Jira with clear steps, severity, and priority.

SOFT SKILLS

Attention to Detail - Analytical Thinking - Problem Solving - Communication - Team Collaboration - Time Management - Adaptability

EDUCATION

Bachelor of Science in Software Engineering

The Hashemite University, Jordan | 2024

LANGUAGES

Arabic - Native | English - Intermediate (Professional Working Proficiency)
